Yr/Sem/Section : III /V / B

ASSIGNMENT 1

TITLE : STUDY OF SYSTEM CALLS

TASK

Surf through the net and write down the various system calls description , syntax with the help of class notes which is being taught in first day class. The list of system calls to be written is as follows.

1. Socket()
2. Bind()
3. Listen()
4. Connect()
5. Accept()
6. Close()
7. Bzero()
8. htons, htonl, ntohs, ntohl()
9. Read()
10. Write()
11. Send()
12. Receive()
13. Sendto()
14. Receivefrom()
15. Select()
16. Setsockopt()
17. Fcntl()
18. getpeername()
19. gethostname()
20. gethostbyname()
21. gethostbyaddr()

- ii) **Study of commands like route, tcpdump, netstat, ifconfig, nslookup and traceroute.**

OBSERVATION & RECORD WORK :

If any structure is used for any of the system calls , mention it along with its members eg: sockaddr_in .., before writing all the system calls.

Pattern :

1) System call name :

i. Description:

ii. Header files:

iii. Syntax:

a. ----- Parameters

iv. Explanation of parameters:

v. Return Value:

vi. Structures used if any:
