

Terminologies in Networks

Mr. N.Sujaudeen
Assistant Professor, Dept. of CSE

This presentation covers

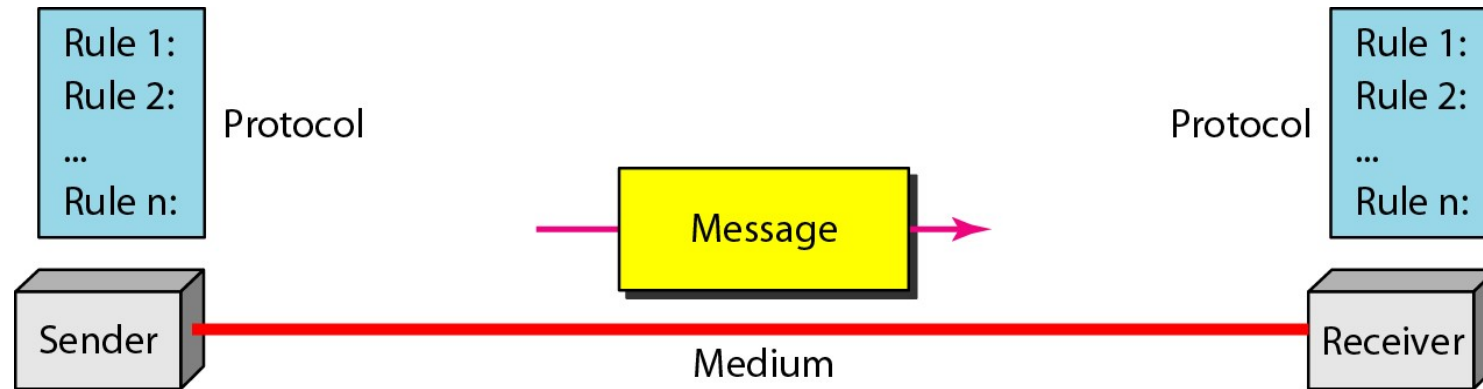

- Terminologies in Computer Networks such as Components of data communication, Dataflow and Topology.

Learning Outcome of this Module

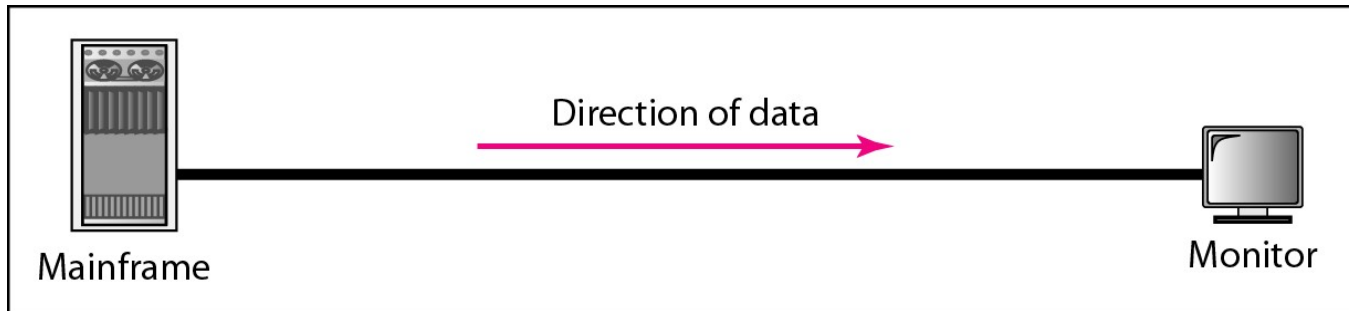

- To understand terminologies used in Computer Networks.

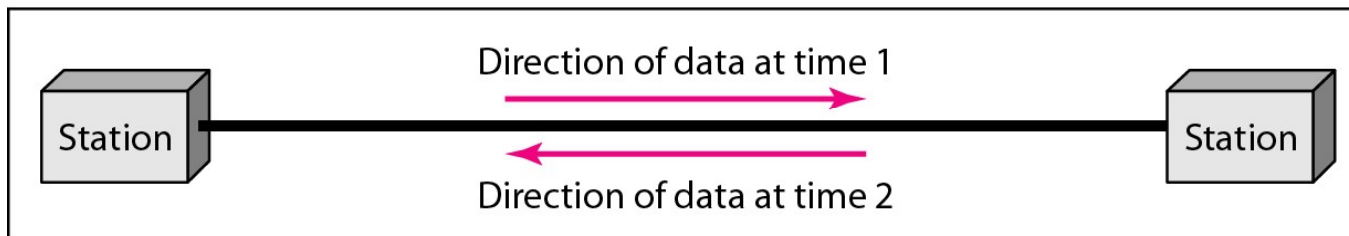

Five components of data communication

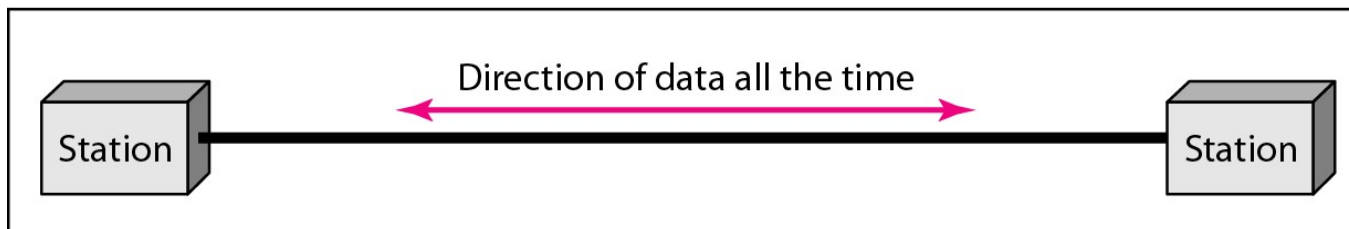

Data flow (simplex, half-duplex, and full-duplex)

a. Simplex

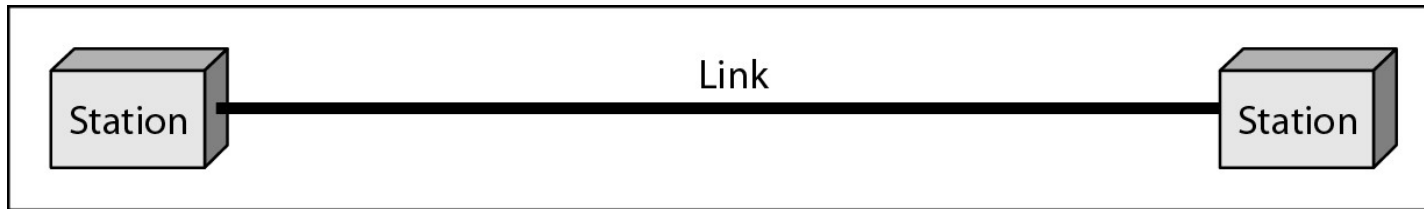

b. Half-duplex

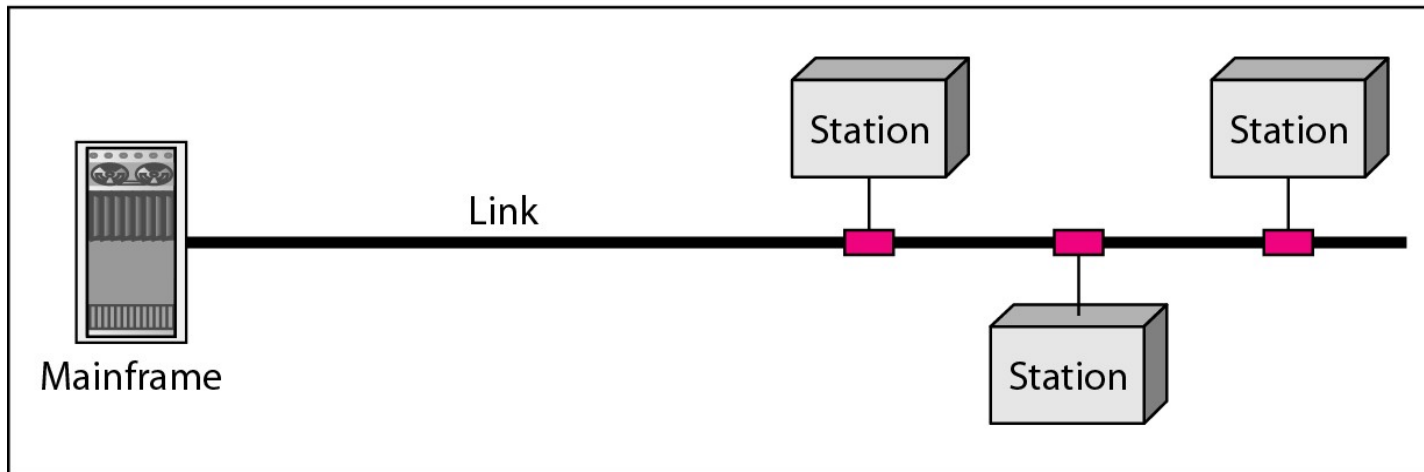

c. Full-duplex

TYPES OF CONNECTIONS

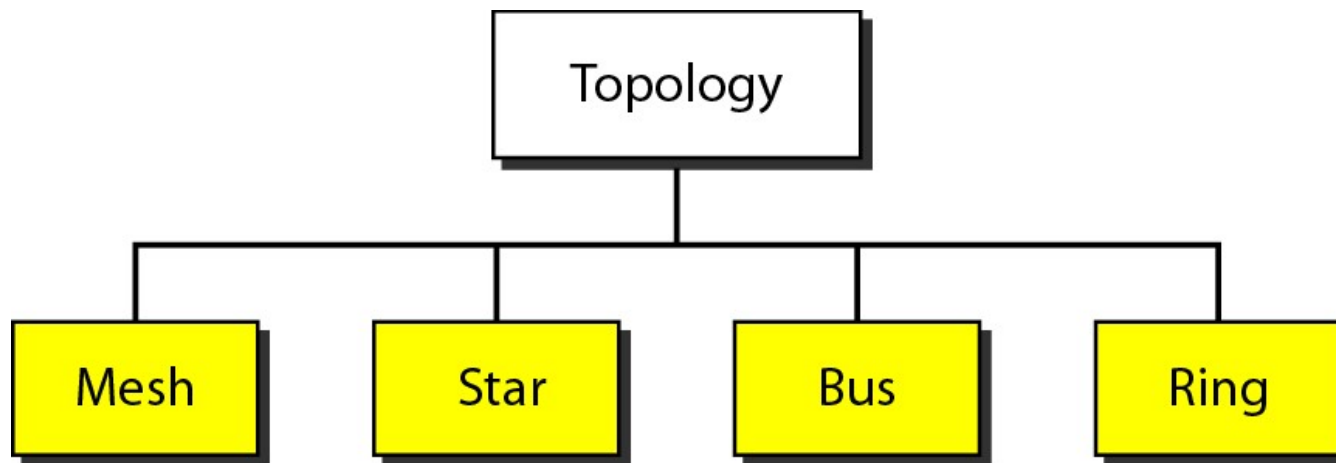

a. Point-to-point

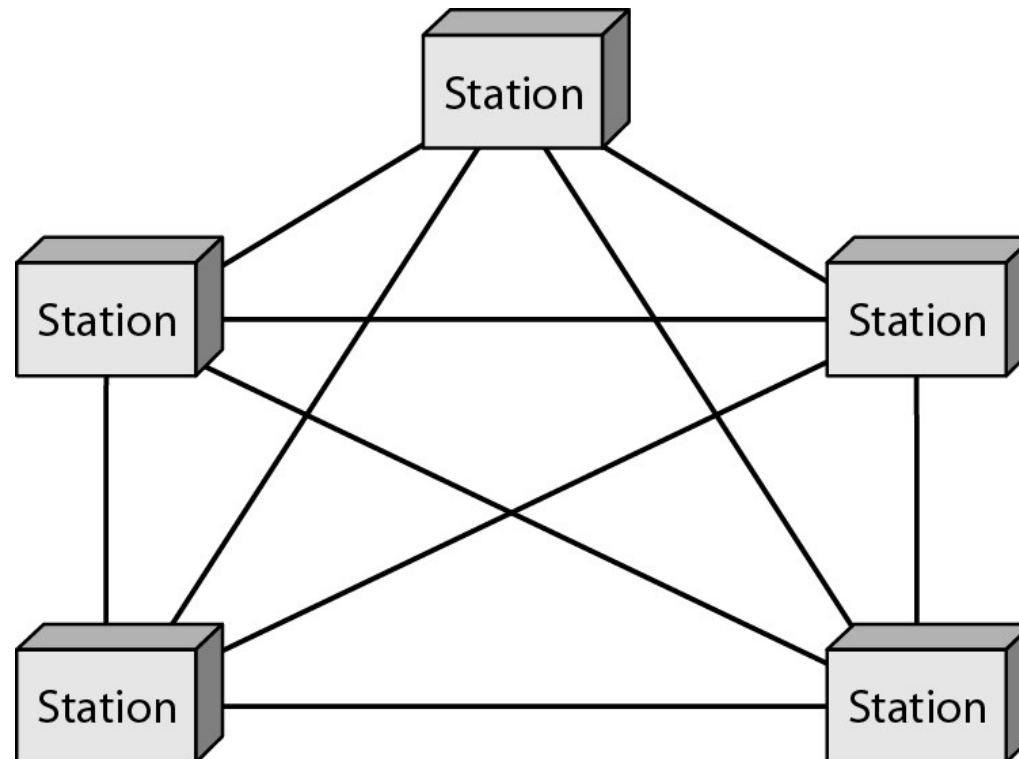

b. Multipoint

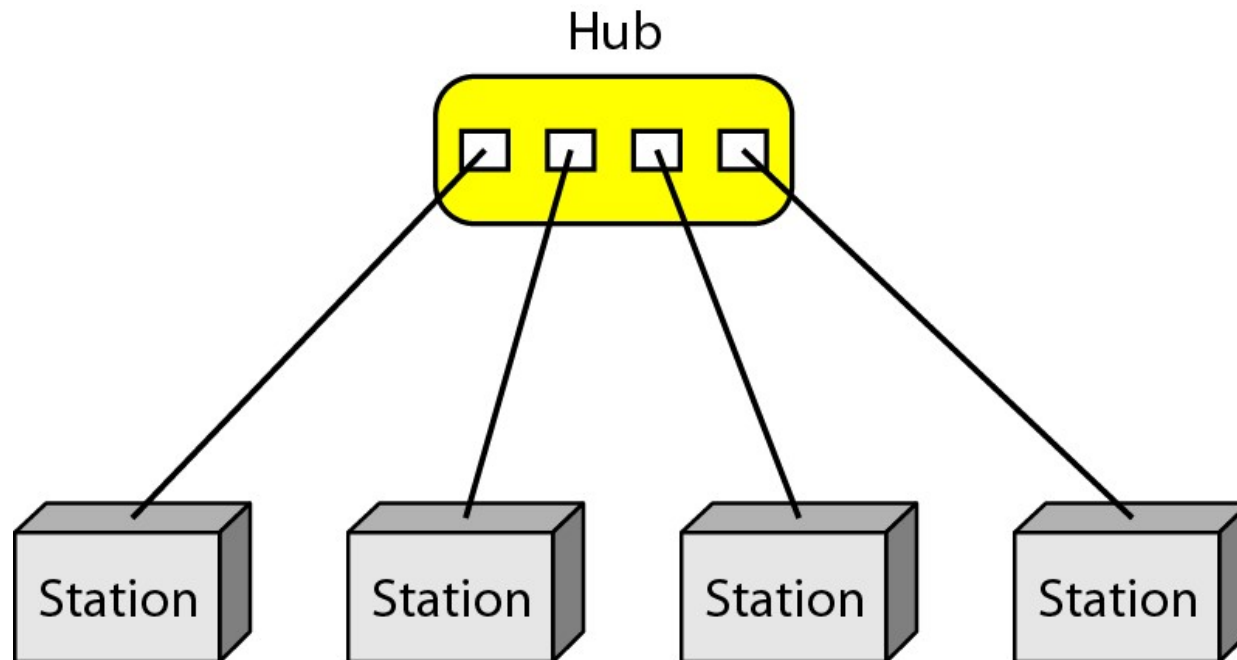

TOPOLOGY

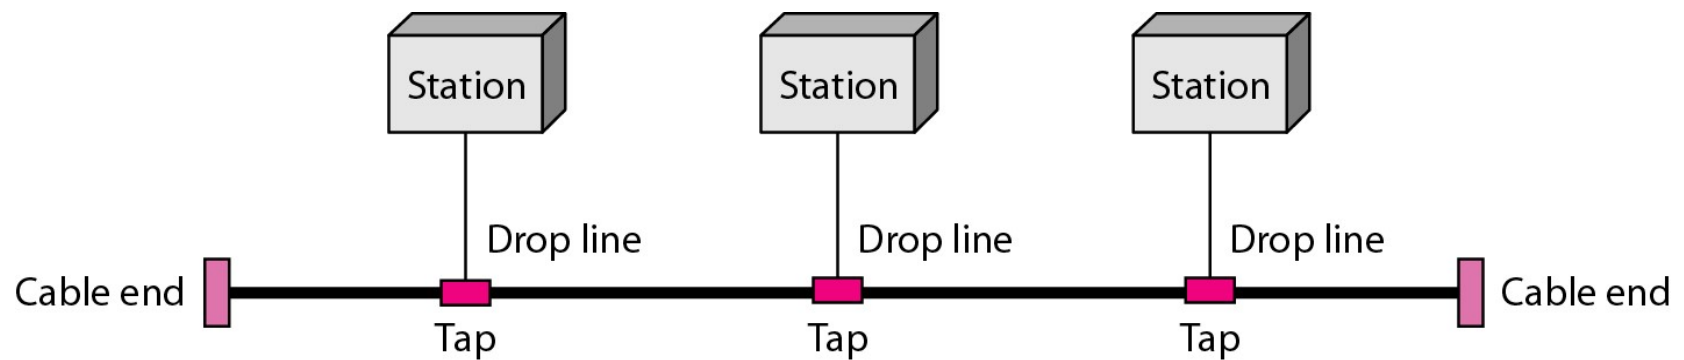

A fully connected mesh topology (five devices)

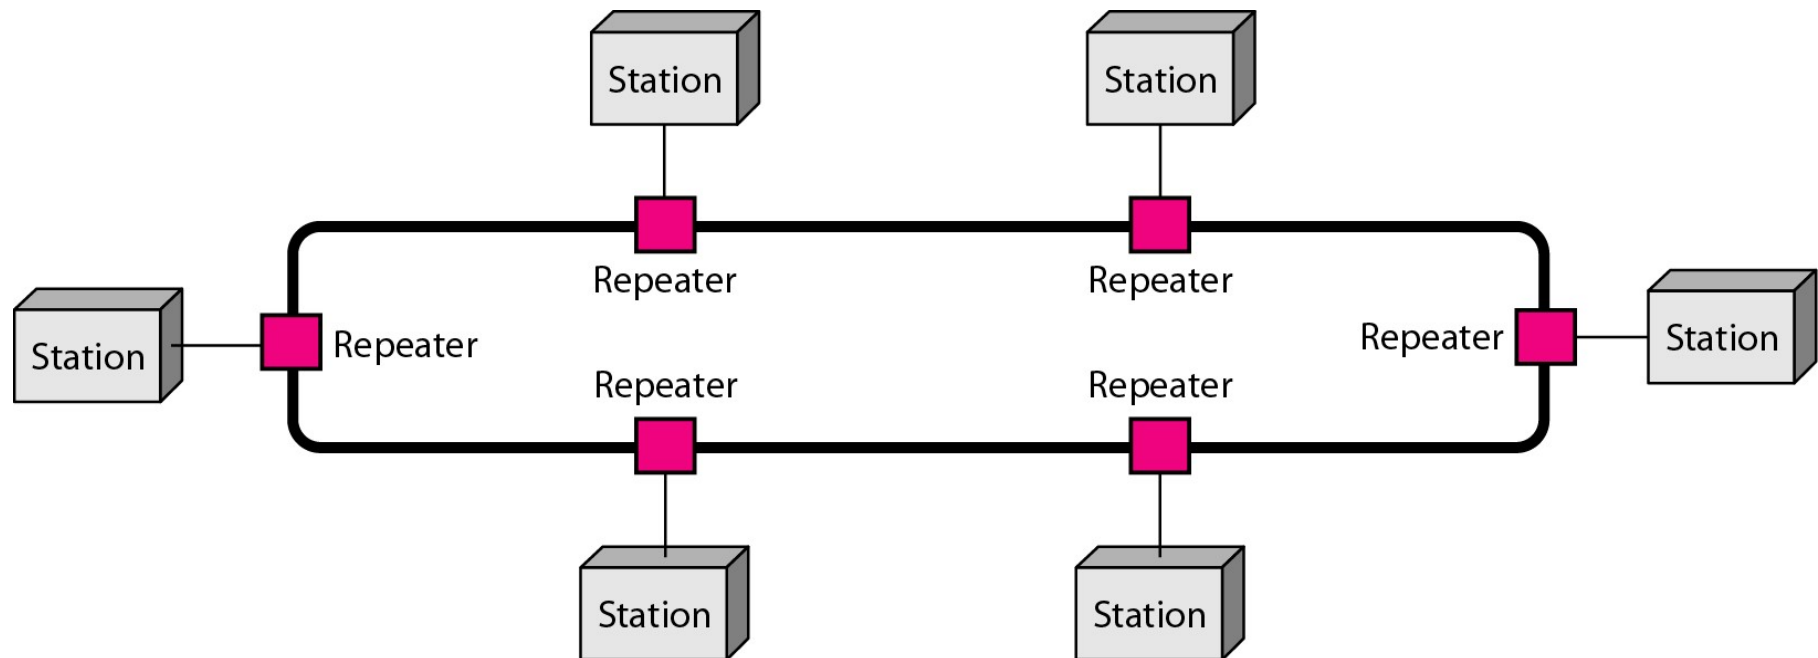

A star topology connecting four stations

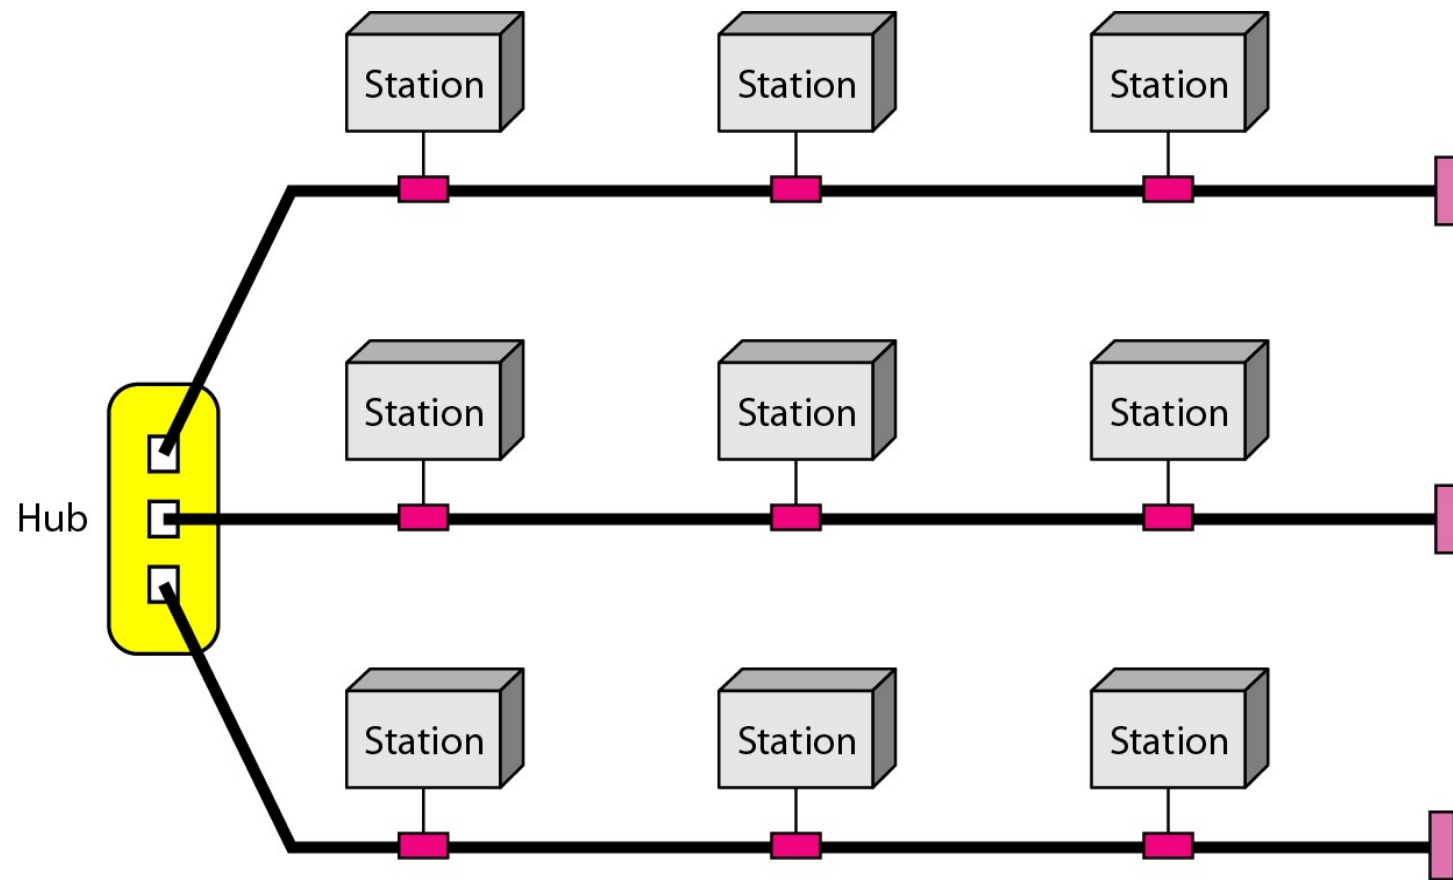

A bus topology connecting three stations

A ring topology connecting six stations

A hybrid topology: a star backbone with three bus networks

THANK YOU...
